

5 REASONS TO TRY TheraCal PT[®]

Dual-Cured Resin-Modified Calcium Silicate
Pulpotomy Treatment

Rx Only

1 Calcium Release

The dual-cured, radiopaque, chemical formulation of TheraCal PT consists of synthetic Portland Cement calcium silicate particles in a hydrophilic matrix, which facilitates calcium release.*

2 Alkaline pH

Alkaline pH promotes pulp vitality.¹

3 Auto-Mix Syringe Delivery

Manual mixing is not required with TheraCal PT. The dispensing tip creates a uniform mix allowing for direct placement.

4 Short Working and Setting Time

TheraCal PT is quick and efficient with a minimum working time of 45 seconds and a maximum setting time of less than 5 minutes. Once cured, the prep can be immediately restored. TheraCal PT is a perfect time-saver for those antsy pediatric patients!

5 Moisture Tolerant

TheraCal PT's unique hydrophilic resin matrix allows for ion exchange and calcium release, but is not water soluble.*
